

## No Fault Found Solutions (2 day duration)

<b>Who should attend?</b>	<b>Why should they attend?</b>
<p>The No Fault Found Solutions course is aimed at Management to Senior Technician levels in the Engineering, Production &amp; MRO environments</p>	<p>No Fault Found (NFF) problems can ground aircraft for days and can lead to faults that recur over years. No flying operation can tolerate this from a safety, availability or cost point of view, and so this course will enable your technical management and supervisory staff to implement NFF tools and techniques to target the main causes of NFF, including intermittent faults, and to recognise the 'old behaviours' that constrain an organisation's ability to deal effectively with NFF arisings.</p>
<b>What will they gain from the course?</b>	<b>What does the course cover?</b>
<p>Attending the NFF Solutions course will provide attendees with a comprehensive overview of proven and highly effective NFF solutions, and the practical knowledge of how to implement them for sustained success.</p>	<ul style="list-style-type: none"> <li>✓ NFF scenarios &amp; terminology</li> <li>✓ NFF impact on safety, availability and cost</li> <li>✓ Detailed evaluation of NFF causes and contributory factors</li> <li>✓ Knowledge-based solutions for NFF reduction</li> <li>✓ Hardware-based solutions for NFF reduction</li> <li>✓ Case study workshop</li> </ul>
